Job Title: Clinical Tracker (3 Positions)

Report to: Council Director

Terms of Employment: One-year contract

Salary: TGHS B

The major functions of the position

Under the direct supervision of the CTC in charge, the Clinical Tracker will engage and mainly supervise the lay staff in appointment reminders 3 days before the appointment, tracing of missed appointment clients, and tracing of clients who have interrupted the treatment. In addition, s/he will engage fully in organizing index contacts to be tracked by lay staff and him/herself to be provided with testing services. All this is aimed at the identification of clients living with HIV, linkage to care, and having good retention in care and treatment services of all clients at respective facilities in the supported Councils. The Clinical Tracker will ensure the provision of HIV and AIDS services is in line with protocol and HIV management guidelines for Tanzania. To fully provide the intended services, the Clinical Tracker will be stationed at the facility where s/he is assigned by the district authority/Partner. The incumbent will ensure appropriate documentation to all appropriate reporting tools.

Specific Duties and Responsibilities:

- Identify clients who miss their clinic visits in schedule timely and conduct telephone tracking.
- Prepare and share with CBHSP/peers/community tracker list of clients who were reachable through the phone and those who don't have telephones.
- Facilitate entry of tracking outcome into the CTC2 card and database with clinician/counselor and data officer.
- Conduct weekly reviews and ensure all tracking outcomes are updated and entered into the CTC2 database.
- Ensure unknown clients are tracked timely and 70% returned to care monthly.
- Work with clinicians, counselors, ART nurses, and data officers to confirm all transfer out in the respective facility.

- Provide health education on the importance of clinic adherence to the client.
- Support the patient's adherence to medication and clinic visit schedules.
- Record and report tracking services daily, weekly, monthly, and quarterly.
- Prepare a weekly, monthly, and quarterly summary report and submit it to the site manager, district retention, and community officer.
- Participate in data management and net loss analysis in respective facilities and districts.
- Participate in QI activities that aim to increase retention at the facility level.
- Bring up any ideas or comments that may contribute to a better patient follow-up system.
- Perform any other duties as assigned by the supervisor.

Qualifications:

- Diploma in Nursing or Medicine and must be registered with the relevant professional body in Tanzania.
- Experience providing HIV/AIDS clinical care in Tanzania or previous experience working in HIV/AIDS care and treatment.
- Fluency in English and Kiswahili.
- Willingness to stay at the working station 100%

Key personal competencies:

- Self-motivated and able to demonstrate high initiative.
- Committed
- A team player
- Good interpersonal skills

Job Title: Data Clerk (5 Positions)

Report to: Council Director

Terms of Employment: One-year contract

Salary: TGHS B.

Major function of the position

The Data Officer will work at the facility level to ensure timely entry of patient files in the health management database both from CTC, Pharmacy Module and RCH, within one day after client service provision by the clinician/Nurse or any provider and undertake data verification on a routine basis to ensure accuracy and consistency of the data entered, reported, and submitted. S/he will provide technical support to the facility staff in any data-related issues.

S/he will communicate closely with the IT & Data Manager in case of any faulty related to

hardware and software. The Data Clerk will report administratively to the facility in charge and work closely with the facility staff, District Data Manager together with DACC.

Specific Duties and Responsibilities:

- Enter patient information including family information, visits, and laboratory results and other findings into the CTC2 module, HTS module, Pharmacy Module and Biometric Module.
- Ensure all the patient's records are properly stored and monitored according to the National guidelines on storage of confidential client information.
- Ensure that patients' monitoring tools are neatly kept and easily accessible when needed.
- Ensure all project reports; daily, monthly, quarterly, semi-annual, and annual reports are of high quality and are produced and submitted on time in the introduced data reporting system.
- Provide data entry support to CHMTs into the DHIS2 including conducting data reviews and validations at the facility level.
- Collaborate with CBHS at community and health facility levels for tracking defaulters, producing the list of Missed Appointments and IIT and updating the database accordingly when patients return to care.
- Provide all the necessary support and assistance on data requests at the facility to program staff and Council Staff.
- Conduct daily, weekly and monthly tracking of all HIV-positive clients from all testing points at the facility level ensuring proper documentation of these clients for easy tracking.
- Actively participate in all QI-related activities and ensure the provision of accurate data on monitored indicators by the QI team within respective assigned facilities.
- Conduct routine analysis of data and display of the key set of HIV/AIDS indicator progress on a monthly/quarterly basis and share findings with the Facility/CTC staff for use and for decision making.
- Conduct monthly data audits. Verify data entered in the CTC2 database and that of the paper-based source. Check the completion of CTC2 cards and work with CTC staff to rectify any inconsistencies.
- Develop, Review and Maintain copies of data collection forms and reports (ensuring accurate updating as needed) and support documentation for data management. Participate in health education activities for preventing HIV transmission, particularly among people living with HIV/AIDS attending clinics in CTC /RCH.

- Work closely with other staff members at CTC and RCH to provide good services to clients attending the clinic.
- Actively follow up and track patients who have missed their clinic visits daily after the end of every clinic session.
- Participate in internal Data Quality Assessment with R/CHMT.
- Conduct monthly data cleaning exercises for respective site/s.
- Prepare a list of patients who are eligible for HVL on a weekly basis from the CTC2 database, share it with the CTC in charge to ensure all HVL samples collected, documented in the eSRS and results received are documented and entered CTC2 cards and downloaded to the CTC2 database on a timely manner.
- Ensure that all TPT records (start and completion) are documented into CTC2 cards and database in a timely manner.
- Ensure continuous backup of the CTC2 database files after every visit (daily for static and weekly basis for mobile sites).
- Conduct routine data checks on client information entered CTC2 database on a daily/weekly basis).
- Conduct day-to-day synchronization of client's appointment dates through the SMS reminder system.
- Provide weekly tracking SMS Reminder reports to the Regional M&E Officer and update client's phone numbers in the CTC2 database.
- Ensure that all the information concerning clients at CTC and RCH are always kept confidential.
- Ensure all Donor reporting requests are prepared and submitted a request by the M&E team or Data Managers.
- Ensure the updated version of the CTC2 database and CTC analytics is running as per NACP requirements and ensure weekly and monthly export of data to NACP (Macro3) is done as per NASHCOP requirements including CQI indicators.
- Ensure client files are arranged in order based on instructions given during the training or order that will reduce time to search for patients' files when clients return for their next visits.
- Keep records of appointments of the clients and ensure missed appointments are communicated to outreach providers (CBHSPs) and the status of clients is updated timely.
- Print the IIT list on a weekly basis and share it with the respective staff for tracings.

- As part of capacity building for clinicians filling out CTC2 cards to be recommended for the next training, the data clerk will be required to keep a record of the clinicians who have not filled out CTC2 cards properly. Return cards for correction and keep a record of the clinician and frequency of files returned.
- To follow up on poorly filled CTC2 cards that were sent back to the clinician for correction and update the corrections into the CTC2 database.
- Produce weekly, monthly, and quarterly facility reports.
- To ensure each patient file contains the TB screening tool and that this is filled in by the clinician during each visit.
- To run the CTC2 database built-in checks for data cleaning.
- To check patient files on the completeness of the CTC2 card and TB screening form before the patient departs using the HJFMRI checklist.
- To assure timely entry of patient files, within one day after reception of the file from the clinician.
- Ensure identification of patients suspicious of failing first-line ART and work with the CTC team to develop individualized treatment plans.
- To ensure that the CTC2 database is always of the most recent version.
- To use the CTC2 database and other data sources to produce high-quality weekly, monthly, and quarterly both NASHCOP and HJFMRI reports and submit the same to the facility in charge for review and if need be, to the District AIDS Coordinator and copy to the Regional M&E Officer.
- To submit weekly datasets for further analysis at the council and regional level.
- Report computer faults within the same day as it has happened.
- Responsible for every new database that is introduced for the project like Train-smart, Male circumcision database etc.
- To assist in establishing and maintaining an effective and efficient records management system.
- To triangulate data in the UCS and work with the HCPs to correct where necessary.
- Accomplish all tasks assigned by the supervisor.
